

DXC-1028

1 of 2

October 27, 1960

Dear Milt:

I am sending you two copies of drawing 11-261-393A and one copy each of drawings 11-261-394A, 11-261-509, 11-261-397A, 11-261-400-411A and 11-261-22A. The submitted drawings have been corrected and redrawn subsequent to the visit of your

25X1A

Would you again please check the compatibility of drawing 11-261-393A with your requirements, initial and indicate approval, and return one copy to me. The other drawings are for your reference file.

I would also appreciate the return of all previously submitted drawings for the spool in order that later confusion might not occur.

Relative to your recent inquiry on correct slit width of SO 8402 or similar emulsion for your handling tests, the ordering quantity would be a 6000 foot length of approximately six rolls. Unfortunately, our manufacturing facilities would not be able to provide this film until some time during the month of January. Your requirements should be made known through Doc and will reach us by normal channels.
